

CLAIMS

What is claimed is:

1. A door and panel assembly for a vehicle, the vehicle having a rear seat and a frame, said assembly comprising:
 - a pair of front doors pivotally attached to the frame; and
 - a pair of rear quarter panels slidably attached to the frame; said rear quarter panels slidable to an open position to permit easier access to the rear seat.
2. The front door and panel assembly of claim 1 wherein when said pair of rear quarter panels are in a closed position, the vehicle appears as a two door coupe.
3. The front door and panel assembly of claim 1 further including means for locking said pair of rear quarter panels in a closed position.
4. A door and panel assembly for a vehicle, the vehicle having a rear seat and a frame, said assembly comprising:
 - a pair of front doors pivotally attached to the frame;
 - a pair of rear quarter panels; and
 - means for slidably attaching said rear quarter panels to the frame.
5. The door and panel assembly of claim 4 wherein said rear quarter panels are slidable to an open position to permit easier access to the rear seat.
6. The front door and panel assembly of claim 4 wherein when said pair of rear quarter panels are in a closed position, the vehicle appears as a two door coupe.
7. The front door and panel assembly of claim 4 further including means for locking said pair of rear quarter panels in a closed position.
8. A door and panel assembly for a vehicle, the vehicle having a rear seat and a frame, said assembly comprising:
 - a pair of front doors pivotally attached to the frame;
 - a pair of rear quarter panels slidably attached to the frame; said rear quarter panels slidable to an open position to permit easier access to the rear seat; and
 - means for locking said pair of rear quarter panels in a closed position;
 - wherein when said pair of rear quarter panels are in the closed position, the vehicle appears as a two door coupe.
